IHSANUL HAK IK

Software Engineer

Kerala, India | +91 90373 12356 | ikihsaan@gmail.com
github.com/ikihsan | linkedin.com/in/ikihsan | ikihsan.me

Software engineer with experience in Rust payment systems and Node.js/NestJS backends. Delivered multi-tenant applications and Flutter business management software, with hands-on work in database design, Linux deployment and AI integration. Exploring Linux boot internals and learning Rust for kernel development, with interests in cybersecurity and ethical hacking.

EXPERIENCE

Software Developer | Harwex Technology, Calicut Jun 2026 - Present

- Configured multi-currency merchant fees with percentage and minimum-charge rules, transferring fees to admin wallets on successful transactions.
- Developed reconciliation features in Rust for scheduled and manual sync via file uploads and API pulls, with configurable import and engine settings.
- Added configurable roles and merchant-specific permissions to role-based access control (RBAC).
- Designed a PostgreSQL audit framework with append-only records, per-row SHA-256 integrity checks and atomic commits with business changes.

Full Stack Developer (Contract) | G3 Interactive, Kochi Feb 2026 - May 2026

- Delivered a live NestJS/TypeScript/MySQL backend for a multi-tenant asbestos-removal platform, serving its Flutter app and web admin portal.
- Implemented inventory and usage-based bill of quantities (BOQ) workflows; managed Linux VPS deployment with Nginx and SSL/TLS.

Junior Software Developer | SpaceAI, Remote Oct 2025 - Feb 2026

- Used Claude to analyze AutoCAD export revisions and built comparison views for Space BIM.
- Built reusable React and Next.js interfaces in TypeScript for production SaaS applications.

Backend Developer Intern | Autobse, Kochi May 2025 - Sep 2025

- Built NestJS/GraphQL APIs and PostgreSQL data models for a real-time vehicle auction platform, including composite indexes.
- Integrated Redis Pub/Sub and JWT/OAuth2 authentication with token refresh and session validation.

SELECTED PROJECTS

Fedora from Boot (In Progress) github.com/ikihsan/fedora-from-boot

- Assembled a BusyBox initramfs and wrote its init script to mount virtual filesystems, display boot diagnostics and start an interactive shell.

Qualitydates Business Management System Flutter, Dart, Firebase

- Built an integrated application for purchasing, inventory, billing, ledgers and analytical reporting.

TripInsta Travel Platform tripinsta.in

- Built a backend for tour package publishing, homepage content management and customer enquiries.

SecureTerminal Messaging App github.com/ikihsan/SecureTerminal-PrivateChatApp

- Built a real-time messaging app with Next.js, TypeScript and Convex, featuring connection codes, bcrypt password hashing and configurable media expiry.

TECHNICAL SKILLS

Languages: Rust, TypeScript, JavaScript, Dart, SQL; C and C++ fundamentals
Backend and data: Node.js, NestJS, REST APIs, GraphQL, PostgreSQL, MySQL, Redis
Web and mobile: React, Next.js, Flutter, Firebase
Infrastructure: Linux, Nginx, Docker, Git; separate application and database VMs
AI integration: OpenAI SDK, MCP, multi-agent orchestration

EDUCATION

B.Tech in Computer Science Engineering 2021 - 2025
KMCT College of Engineering | CGPA: 7.66
